DRUG BENEFITS

DRUG

Health Canada's drug benefits program covers a limited range of drugs. This federal program has its own drug benefit list which is different from the one used by the Régie d'assurance maladie du Québec (RAMQ), which makes it one of the more complex programs for the Quebec region.

The various preauthorisation processes associated with this program have the effect of complicating access and comprehension.

Depending on the drug category, the pharmacist is subjected to Health Canada's preauthorisation process in order to be able to provide the prescribed drug to their patient free-of-charge.

See the table explaining the drug categories on pages 64 and 65 of this section.

A list of drugs that are covered by the NIHB program does exist. However, it is not an exhaustive list. The list does not include all of the drugs that could be covered by the program (exceptions, non-benefits, etc.), which has the effect of complicating the work of the physicians who wish to prescribe a treatment to their patient.

THE DRUG EXCEPTION CENTRE

(sometimes referred to as the “Department of Indian Affairs” by some professional/providers).

The Drug Exception Centre is located in Ottawa and hires dozens of people who are responsible for evaluating, analysing and authorising all of the prescription drugs requiring prior authorisation, additional medical justifications, etc. Only the pharmacists can contact this centre. There is no customer service intended for the clients or the workers in the First Nations communities.

Each time the pharmacist's electronic system indicates that a prescription is not covered by the NIHB program, **the pharmacist must initiate an exception request by directly calling the Drug Exception Centre in Ottawa.**

The pharmacist then receives a number associated with the authorisation request for the drug in question. The decision regarding coverage for the patient's treatment will be confirmed by fax once the prescribing physician has justified the treatment to the Drug Exception Centre. The Centre also has discretionary powers related to the reimbursement of medication in exceptional situations.

 See the trajectory of a prescription on page 67 of this section.

Contrarily to the Drug Exception Centre, the role of Health Canada's Claims Processing Centre in Montreal is minimal with respect to drug benefits.

It is possible for the Montreal office to provide some information regarding the steps that have been taken in a client's file. Moreover, in order to obtain information regarding a request, Health Canada's Montreal office is the only organisation that can be contacted by the workers and clients from the First Nations communities.

Health Canada's Claims Processing Centre: 1-877-483-1575.

THE DRUG BENEFIT LIST

As previously mentioned, the NIHB program includes its own drug benefit list, which is different from the one offered by the provincial plan of the RAMQ for non-Aboriginal people.

The RAMQ's drug benefit list is analysed and updated by the *Conseil du médicament du Québec*. Considering that the majority of the pharmaceutical companies are located in Quebec and that their lobbying efforts are quite significant, new pharmaceuticals have a tendency to appear on the RAMQ's list more quickly.

Meanwhile, the NIHB drug benefit list is a **national list**. It applies to all First Nations across Canada and does not take into consideration the evolution of the drug benefit lists of the provincial plans such as the RAMQ.

The NIHB Drugs and Therapeutics Advisory Committee (DTAC) is the national committee performing analyses with the power of recommendation for any additions or modifications to the NIHB drug benefit list. However, Health Canada is the only decision-making authority that can determine what will be added to the list.

The physicians who practice in Quebec are accustomed to accessing the RAMQ's drug benefit list, but very few of them are familiar with using the NIHB's list. This is explained by the fact that, due to the low percentage of First Nations among the Quebec population, the RAMQ's list is used more in their daily practice.

Before prescribing a drug to a First Nations patient, the physician should first of all ensure that the drug they are recommending is included in the NIHB drug benefit list.

However, to that end, it is important for the patients to identify themselves as being First Nations members. It is also important to be aware that the NIHB drug benefit list is available online but it is not systematically distributed among the physicians by Health Canada.

NIHB DRUG BENEFIT LIST

If you would like to access the drug benefit list, it is very easy to find using Google by entering: NIHB drug benefit list.

CLASSIFICATION OF THE DRUGS ON THE NIHB LIST

The NIHB program's drug benefit list is available online. However, it does not include many drugs that could be covered by the program (exception, exclusion, etc.), which has the effect of complicating the work of the physicians who wish to prescribe treatment to their patients. **It is important to be aware that certain drugs require patients to try other treatments first before they can be approved by Health Canada. This is often one of the reasons justifying payment denial by Health Canada.**

All of the drugs covered by virtue of the NIHB program require a prescription.

Drugs are classified as follows:

Category	Description	Medical justification from the physician	Appeal processes
Over-the-counter drugs	These are available on the shelves of the pharmacies, but require a prescription in order to be covered by the NIHB program.	Only if the quantity or frequency limit is exceeded.	Very rarely
Drugs that are covered with restriction	These are drugs that are included in the NIHB drug benefit list and for which no prior authorisation is required.	Only if the quantity or frequency limit is exceeded.	Very rarely
Exception drugs	These are not included in the NIHB drug benefit list and must be approved on a case by case basis supported by medical justification. The eligibility criteria for exception drugs are not available to the health professionals or patients and they are not available online. Only the Drug Exception Centre knows what they are.	Always through a form sent to the prescribing physician by the Drug Exception Centre.	Sometimes
Limited use drugs	Limited use drugs are perceived as being useful under certain circumstances, or are subjected to restrictions regarding quantity or administration frequency. These drugs are only covered if their use meets specific eligibility criteria. The eligibility criteria for certain limited use drugs are available in the drug benefit list of the NIHB program and online. However, only the Drug Exception Centre knows them all.	Always through a form sent to the prescribing physician by the Drug Exception Centre.	Sometimes

(cont'd)

Category	Description	Medical justification from the physician	Appeal processes
Drugs that are not included in the list (non-benefits)	<p>These are not included in the drug benefit list of the NIHB program. Coverage for this type of drug is systematically denied but can sometimes be considered under exceptional circumstances within the context of an appeal request. The physician is then required to provide medical justification.</p> <p>Drugs that are not included in the list as well as their eligibility criteria are not available for the health professional or the patients and are not available online. Only the Drug Exception Centre knows what they are.</p>	Always	Mandatory
Drugs that are excluded from the NIHB program	<p>Certain drugs are considered to be excluded from the NIHB program.</p> <p>The appeal process and emergency supply policy do not apply to drugs that are excluded from the NIHB program.</p>	Never	Never

Certain additional drugs that are not included in the NIHB drug benefit list can be covered for certain specific clienteles such as those suffering from renal failure or palliative care patients. These clienteles can be identified through the usual prior authorisation process.

 See the form for palliative care in the section.

 See the descriptions for each of the classes of drugs in the NIHB information booklet on pages 21 and 22.

PRESCRIPTION DRUG INSURANCE IN QUEBEC

According to **An Act respecting Prescription Drug Insurance in Quebec**, those who are Aboriginal according to the Indian Act (status Indians) do not have access to **Quebec's public drug insurance plan** and therefore cannot benefit from drugs covered by the RAMQ. First Nations members must access drugs through Health Canada's (federal government) NIHB program.

INCOME SECURITY BENEFICIARIES

Health Canada's drug coverage program (NIHB) must also mandatorily be used by the income security beneficiaries **regardless of whether they live on- or off-reserve**.

The provincial income security beneficiaries receive, just like beneficiaries among the population of Quebec, a claim slip allowing them to access certain health services including drug benefits. **However, First Nations members who receive this claim slip must identify themselves as such when visiting their pharmacy so that their drugs can be billed to Health Canada rather than the RAMQ.**

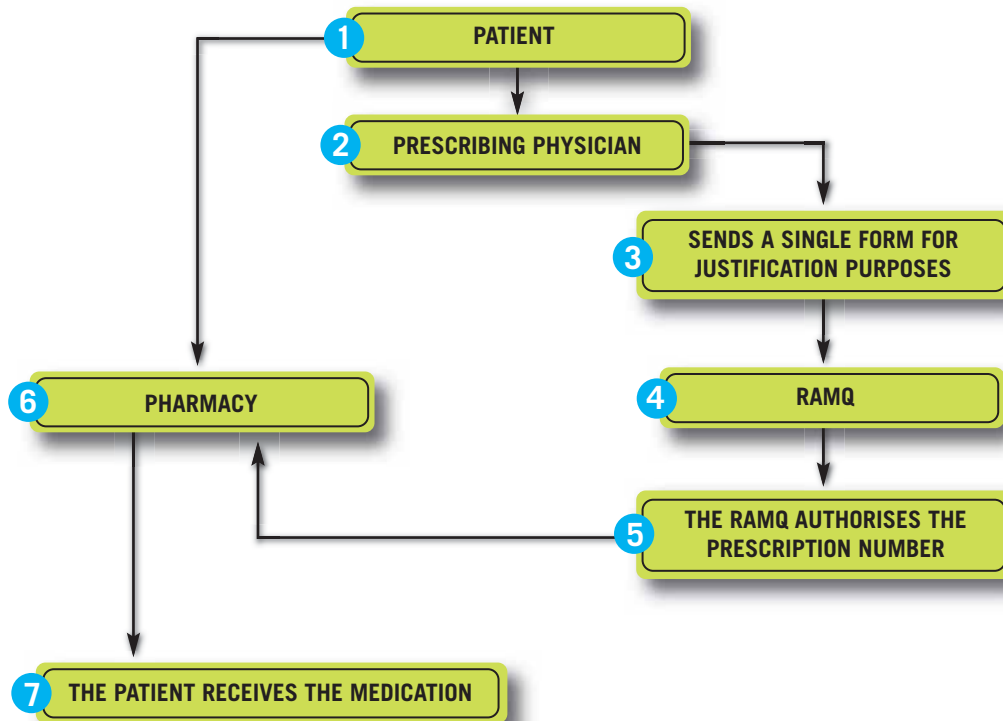

In situations where the RAMQ discovers that claims were made by First Nations members to their plan, the client could be obligated to retroactively reimburse all of the drugs that were covered.

If necessary, the client could then request reimbursement from Health Canada (NIHB). However, since the RAMQ's drug benefit list is different from the NIHB's list, there is a risk that the drugs may not be eligible for reimbursement by Health Canada. **The client could then be forced to pay a significant amount of money to the RAMQ.**

65 YEARS AND UP

When a First Nations person turns 65 years of age, sometimes pharmacists automatically transfer the billing to the *Régie de l'assurance maladie du Québec* (RAMQ). It is important for your clients to know that, even after 65 years of age, they remain under the responsibility of the NIHB program for their drugs.

TRAJECTORY OF A PRESCRIPTION THROUGH THE RAMQ PROGRAM

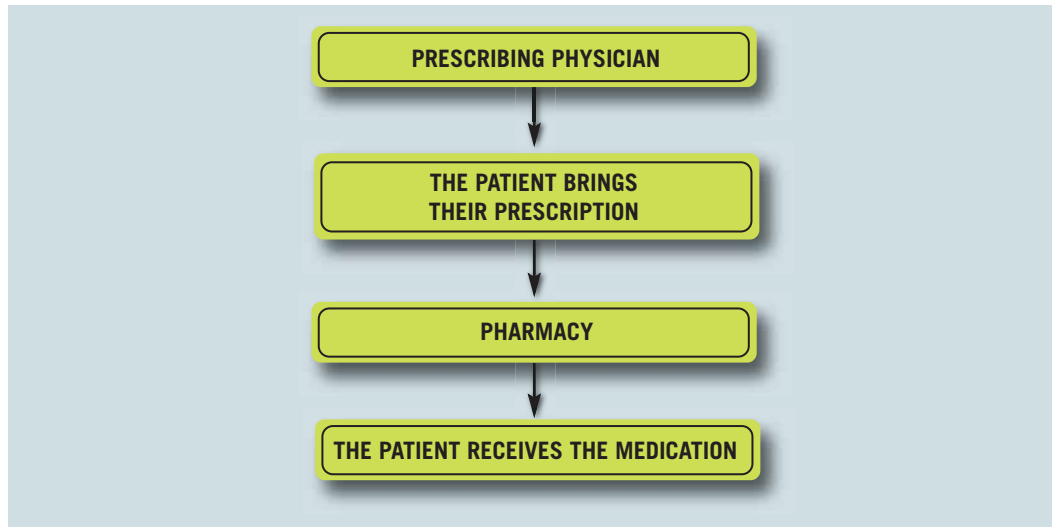

- 1 The patient visits the physician.
- 2 The client obtains their prescription from their treating physician.
- 3 4 The physician initiates the exception request using a single form that is valid for all drugs which is then forwarded directly to the RAMQ along with all of the required medical justification.
- 5 The RAMQ authorizes the reimbursement of the prescription.
- 6 7 Once the client arrives at the pharmacy, the request is already processed and the pharmacist can provide the drug to the client.

The fact that physicians can initiate exception requests themselves with a single form highly facilitates processing and considerably reduces the delay associated with authorisation.

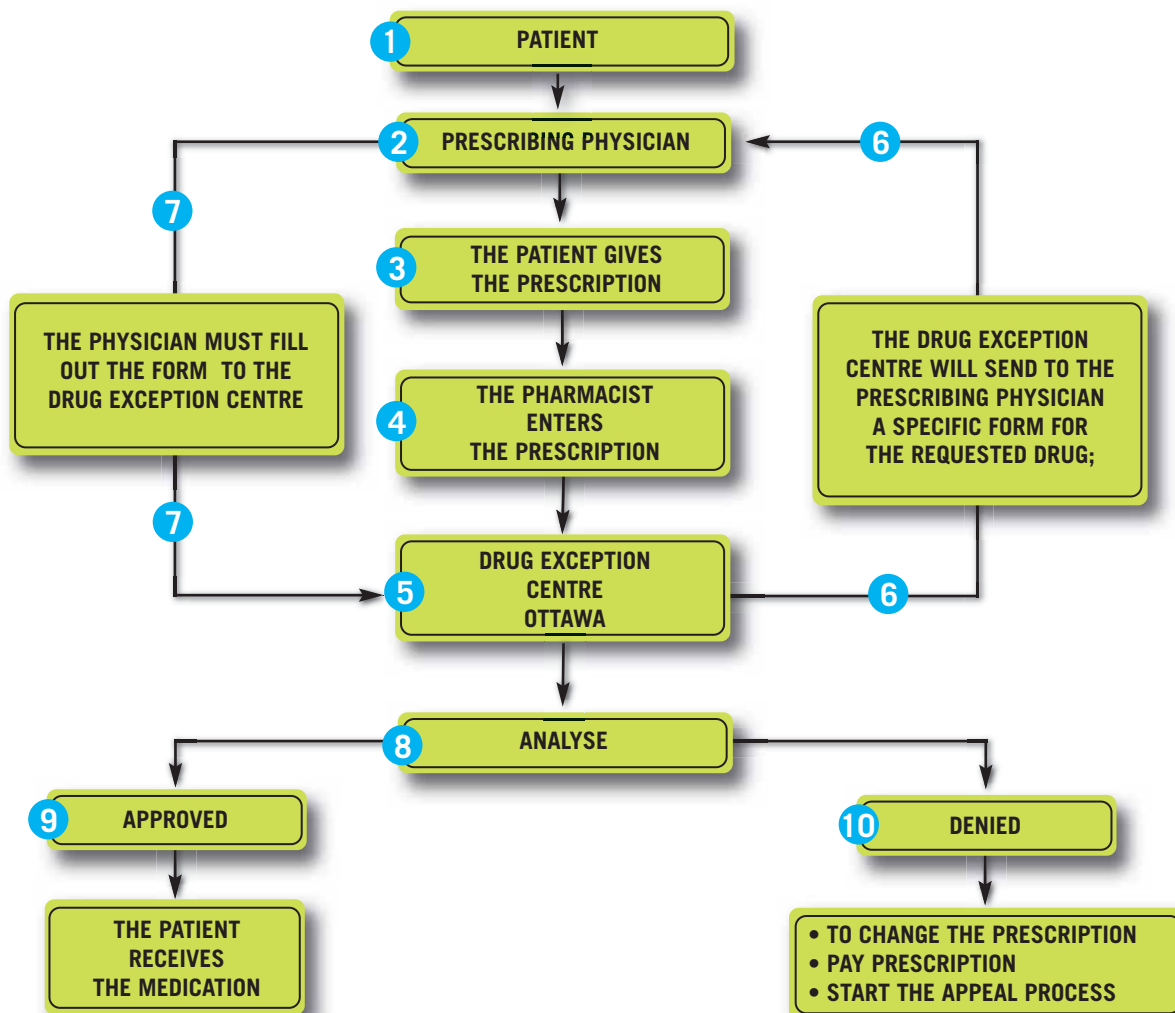

WHAT IS THE PRESCRIPTION TRAJECTORY FOR A FIRST NATIONS PATIENT?

FOR OVER-THE-COUNTER DRUGS AND DRUGS THAT ARE COVERED WITHOUT RESTRICTION (DRUGS ON THE LIST):

- The patient receives a medical prescription from their physician;
- The patient gives the prescription to the pharmacist;
- The pharmacist enters the prescription into their electronic system;
- The pharmacist provides the drug to the patient free-of-charge.

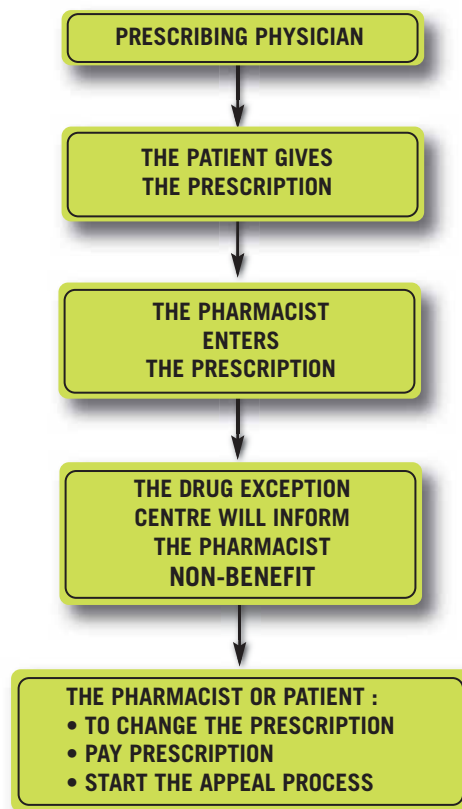

FOR LIMITED USE DRUGS AND EXCEPTION DRUGS:

- 1 The patient visits the physician.
- 2 The patient receives a medical prescription from their physician;
- 3 The patient gives the prescription to the pharmacist;
- 4 The pharmacist enters the prescription into their electronic system;
- 4 The pharmacist receives an electronic message informing them that this drug is not covered by the NIHB program;
- 5 The pharmacist must **MANDATORILY** initiate an exception request with the Drug Exception Centre;
- 6 The Drug Exception Centre will send to the prescribing physician a specific form for the requested drug;
- 7 The physician must fill out the form and then return it to the Drug Exception Centre;

- 8 The Drug Exception Centre will analyse the information that the physician entered into the form as well as the patient's pharmacological file before deciding whether or not the drug will be covered;
- 9 If payment for the drug is **approved**, the Drug Exception Centre will send a message by fax to the pharmacist confirming this. The drug can then be provided to the patient free-of-charge;
- 10 If payment for the drug is **denied**, the Drug Exception Centre will send a message by fax to the pharmacist in order to inform them accordingly:
 - The pharmacist can contact the physician and ask for the prescription to be modified;
 - The patient can contact the physician and ask for the prescription to be modified;
 - The patient can appeal the decision made by Health Canada;
 - The patient can pay for the drug.

FOR NON-BENEFIT DRUGS:

- The patient receives a medical prescription from their physician;
- The patient gives their prescription to the pharmacist;
- The pharmacist enters the prescription into their electronic system;
- The pharmacist receives an electronic message informing them that this drug is not covered by the NIHB program;
- The pharmacist must **MANDATORILY** initiate an exception request with the Drug Exception Centre;
- The Drug Exception centre will inform the pharmacist that the drug is not eligible for reimbursement by the program and that the patient must, in order to seek coverage, initiate appeal procedures, or:
 - The pharmacist can contact the physician and ask for the prescription to be modified;
 - The patient can contact the physician and ask for the prescription to be modified;
 - The patient can pay for the drug.

REIMBURSEMENT OF THE PHARMACISTS

HOW ARE THE PHARMACISTS PAID BY HEALTH CANADA?

All of the pharmacists who provide services to First Nations must use the online billing system and are therefore registered/connected to a national electronic system connecting them directly to Health Canada.

Express Script Canada (ESC) is an organisation that uses an electronic system allowing the pharmacists to bill Health Canada directly for services rendered.

ESC is also the organisation responsible for auditing the financial statements and the accuracy of the pharmacists' invoices. It has the power to recover money from pharmacists when discrepancies are found in the billing. **ESC has no power related to the authorisation of drugs or medical supplies and equipment.** It is only the organisation responsible for the financial management.

THE FOUR DAY SUPPLY RULE

In cases where the physician requires additional medical justification, the pharmacist can, **if supported by their professional judgement**, apply the four day supply rule in order to accommodate the client and immediately begin treatment.

This consists of providing a quantity of drugs covering a period of four days of treatment without waiting for authorisation or being certain that this drug will be covered by Health Canada's Drug Exception Centre. In all cases, reimbursement for these four days of treatment will be covered by Health Canada, even if the final decision is made not to cover treatment. This four day supply rule is often used for antibiotherapy but pharmacists are not obligated to provide it. They can refuse to apply this rule.

IMPORTANT NOTE

BE CAREFUL REGARDING MEDICAL JUSTIFICATION

When the Drug Exception Centre denies coverage for a drug after having analysed the medical justification that the physician provided, **no follow-up will be carried out with the physician in order to inform them that their patient's treatment was denied.** However, the Drug Exception Centre will inform the pharmacy that treatment was denied.

Therefore, if the pharmacy or patient does not take any additional steps, the Drug Exception Centre will automatically close the authorisation request for the requested drug after two weeks.

In the same vein, if the physician does not fill out the exception form that was transmitted to them by the Drug Exception Centre, or if information is missing, no follow-up will be carried out with the client or their pharmacy and the file will be automatically closed after a period of two weeks.

WHY IS THE PHARMACIST ASKING YOUR CLIENT TO PAY FOR THEIR DRUGS?

There are six possible reasons

Reason 1 The drug is an exception.

Reason 2 The drug is excluded from the program.

Reason 3 The drug quantity that is normally granted for a renewal has been exceeded or the renewal frequency limit is not being respected.

Reason 4 Overbilling by the pharmacist:
A) The pharmacist's profit margin is too large.
B) Poor synchronisation of the electronic systems.

Reason 5 Your client has just received their status (Mclvor case).

Reason 6 Coordination of the benefits (private insurance).

Reason

The drug is an exception.

The list of drugs that are covered by the NIHB program is available on Health Canada's website. However, the physicians seldom consult the list online before prescribing treatment. Furthermore, few physician's offices possess a hard copy of this list.

Therefore, physicians are not very familiar with the NIHB drug benefit list and are even less familiar with the list of exception drugs. It is important to keep in mind that certain drugs require other treatments to be tried before they can be approved by Health Canada. This is often one of the reasons justifying denied payment by Health Canada.

WHAT IS AN EXCEPTION DRUG:

These are not included in the drug benefit list and must be approved on a case by case basis with medical justification.

The eligibility criteria are not available to the health professionals (physicians and pharmacists) or patients, nor are they available online. Only the Drug Exception Centre possesses them.

As described in the previous pages, when the pharmacist enters the prescription into their electronic system, they receive a message informing them that the drug is not covered by Health Canada. The pharmacist must then contact the Drug Exception Centre in Ottawa in order to initiate an exception request.

A specific form exists for each exception drug. These forms are only available through the Drug Exception Centre. Following the initiation of the process by the pharmacist, the Drug Exception Centre faxes to the physician the form corresponding to the exception drug prescribed. The physician must use it to justify why this drug is advisable for their patient's medical condition. Finally, the physician must return the form by fax to the Drug Exception Centre in Ottawa.

The Drug Exception Centre team analyses the medical justifications provided by the physician and the pharmaceutical portrait of the client, before deciding, according to pre-established criteria that are specific to this drug, whether or not the program will cover the treatment.

SOLUTIONS TO POSSIBLE PROBLEMS

Problems	Solutions
The pharmacist did not initiate a request process with the Drug Exception Centre.	<p>Ask the pharmacist if they initiated a request process with the Drug Exception Centre (DEC).</p> <p>The pharmacist must call the DEC: 1-800-580-0950.</p>
The physician did not fill out or transmit the duly completed forms to the Drug Exception Centre, which therefore cannot authorise the request.	<p>The pharmacist can contact the physician in order to verify whether or not the forms were sent to the Drug Exception Centre.</p> <p>The pharmacist can verify with the Drug Exception Centre whether or not the physician's forms were received. DEC: 1-800-580-0950.</p> <p>The client or worker can contact Health Canada's Drug Exception Centre in order to verify whether or not the forms were transmitted. Claims Processing Centre: 1-877-483-1575.</p>
<p>The drug does not meet the eligibility criteria of the NIHB program because:</p> <ul style="list-style-type: none"> • The physician did not provide the right medical justifications; • The physician did not have their client try other covered treatments before requesting the exception drug. 	<p>The pharmacist can contact the treating physician and mention to them that reimbursement for the drug is denied.</p> <p>The physician can decide whether or not they will prescribe another drug that would be reimbursed by Health Canada.</p> <p>If not, they can also be asked to collaborate with the patient in order to appeal the decision made by the Drug Exception Centre.</p> <p> <i>See the section on the appeal procedures.</i></p>

Reason

2

The drug is excluded from the program.

DEFINITION OF AN EXCLUSION FROM THE NIHB PROGRAM:

Certain drugs are not considered to be the responsibility of the NIHB program. The appeal process and the emergency supply policy do not apply to excluded drugs.

See program exclusions on page 23 of the NIHB information booklet.

The list of drugs that are excluded from the NIHB program is available online.

SOLUTIONS

1. The client can choose to pay in order to access their treatment but they will not be reimbursed by Health Canada;
2. The client can contact the physician in order to request alternative treatment while ensuring that it is covered by Health Canada;
3. The pharmacist can contact the physician in order to suggest a drug that is covered by the NIHB program.

Reason

3

The drug quantity that is normally granted for a renewal has been exceeded or the renewal frequency limit is not being respected.

When the pharmacist enters the patient's prescription into their electronic system, it is possible that a signal will inform them that the requested quantity is higher than what Health Canada can authorise. The electronic system may also inform the pharmacist that it is too early for a renewal (e.g. if the client loses their medication two days after receiving it).

If the client needs to renew their prescription earlier than what is normally allowed, the pharmacist must contact the Drug Exception Centre which may, depending on the situation, provide authorisation.

If the physician prescribed a quantity that is greater than what is authorised by Health Canada, the pharmacist must contact the Drug Exception Centre in order to initiate an exception request for this treatment. The drug is then treated like an exception drug.

See how exception drugs are processed on page 69 of this section.

The Drug Exception Centre will then forward a form to the treating physician so that they can justify the unusual drug quantity being requested.

Example: TYLENOL is an over-the-counter drug that can be covered by the NIHB program with a prescription. If the number of TYLENOL pills required for your client's treatment exceeds 1200 pills for a duration of 100 days, the pharmacist will be required to initiate an exception request, even if this drug is usually covered without preauthorisation and without restriction. In this case, the exception is caused by the quantity.

SOLUTION

- The pharmacist must request an exception from the Drug Exception Centre in Ottawa;
- Your client can also contact Health Canada's Claims Processing Centre at 1-877-483-1575. They will be able to obtain their support to contact the pharmacist and resolve the issue.

Reason **4**

Overbilling by the pharmacist: A) The pharmacist's profit margin is too large.

All of the pharmacy owners are members of the *Association québécoise des pharmaciens propriétaires* (AQPP). Health Canada periodically negotiates an agreement with the AQPP in order to establish the reimbursement rates for drugs and other medical supplies and equipment that are available in the pharmacies. This agreement also governs the professional fees of the pharmacists that are billed when processing prescriptions.

This means that pharmacists who are members of the AQPP, by virtue of their agreement, **must** sell to the First Nations the drugs and medical supplies and equipment that are reimbursed by Health Canada.

If a drug is covered by the NIHB program, it is covered in full and the client should never be required to pay a residual amount.

However, sometimes, some pharmacists charge an amount that is higher than the amount reimbursed by Health Canada. The pharmacist may be tempted to charge the difference between the regular sale price and the amount covered by Health Canada for its First Nations clientele.

Pharmacists who overcharge are not respecting the agreement reached with the AQPP and they can be denounced to this association in the form of a grievance (complaint).

If the service the pharmacist provides is inadequate, it is also possible to file a complaint with the *Ordre des pharmaciens du Québec*.

 See the appended complaint form.

SOLUTION

- Your client can contact Health Canada's Claims Processing Centre at 1-877-483-1575. They will be able to obtain support in order to resolve the issue;
- Your client can file a complaint with Health Canada by describing the issue caused by their pharmacist's overbilling. With this information, Health Canada will be able to take steps with the AQPP;
- Your client can file a complaint with the *Ordre des pharmaciens du Québec* (see the appended form);
- If your client has already paid the bill, they can still seek reimbursement by **forwarding by mail**:
 - The pharmacy's original invoice;
 - A duly filled out NIHB reimbursement form.

 See the appended form.

All the documentation must be transmitted to the following address (a delay of 30 days should be anticipated to receive the payment):

First Nations and Inuit Health Branch
Quebec region
Non-Insured Health Benefits
Guy-Favreau Complex, East Tower, Suite 404
200 René-Lévesque Boulevard West
Montreal, Quebec H2Z 1X4

Reason

4

Overbilling by the pharmacist: B) Due to the poor synchronisation of the electronic systems.

All of the pharmacists are connected to the ESC electronic system for billing and the reimbursement of drugs by Health Canada's NIHB program.

 See how the ESC operates on page 72 of this section.

Drug prices can fluctuate over the course of a given year. Pharmacists receive an indexation on drug prices very quickly from the manufacturers.

Meanwhile, Health Canada's billing system is a national system and its drug prices are not adjusted as quickly.

Therefore, when the pharmacist bills a drug with an indexed price, sometimes the ESC electronic system (Health Canada) reimburses a lower amount because the price of the drug has yet to be adjusted.

The pharmacist may be tempted to bill the client the residual cost adjustment amount in order to receive the difference between the new sales price and the amount reimbursed by ESC.

SOLUTION

- Your client can contact Health Canada's Claims Processing Centre at 1-877-483-1575. They can obtain support in order to resolve the issue;
- You or your client can ask the pharmacist to contact the ESC to verify the billing details at 1-866-511-4666;
- Your client can file a complaint with Health Canada by describing the overbilling issue related to their pharmacist. With this information, Health Canada will be able to take steps with the AQPP;
- Your client can file a complaint with the *Ordre des pharmaciens du Québec*.

 See the appended form.

Reason

5

Your client has just received their status (McIvor case).

In 2009, following the Supreme Court of Canada's decision regarding Bill C-31, many First Nations people received their official status from Aboriginal Affairs and Northern Development Canada (AANDC).

Therefore, before obtaining their status, these clients' medications were covered by the Régie d'assurance maladie du Québec (RAMQ). However, they are now legally excluded from this provincial program's drug coverage and must now mandatorily access Health Canada's NIHB program for their drugs **starting from the date that is indicated in the letter from AANDC confirming their status.**

It is possible that some of the drugs that were covered by the RAMQ will not be automatically reimbursed by the NIHB program (ineligible, exception, etc.). Depending on the class of drug, different processes could apply.

 See the drug classification description on pages 64 and 65 of this section.

FOR EXAMPLE:

Your client, before they had First Nations status, took SEROQUEL XR (extended release) for five years and their medication was covered by the RAMQ. However, your client recently obtained their official First Nations status. Unfortunately, SEROQUEL XR (extended release) is ineligible for the NIHB program and therefore automatically requires an appeal process. Only short-acting SEROQUEL is covered by Health Canada.

In order to continue their treatment, your client must therefore draft a letter of appeal and ask their physician to justify in writing the use of SEROQUEL XR.

After analysing your client's file, it is possible that Health Canada may deny coverage for SEROQUEL XR and recommend that the physician prescribe SEROQUEL (fast-acting) which involves a change in how it is administered, and therefore a change in long-established treatment habits.

In some cases, certain treatments may have been initiated before the First Nations status was obtained and was therefore paid by the RAMQ. If this drug is an exception drug for the NIHB program but the cost is not too high compared to what Health Canada would provide as alternative treatment, the Drug Exception Centre may decide to cover the drug.

It is important to keep in mind that since the clients who have recently received their status previously had their drugs covered by other public or private plans, Health Canada does not possess their pharmacological history. In some cases, this background information is needed in order to allow for eventual treatment approval by Health Canada. With the client's authorisation, this information may be transferred to Health Canada.

It is important to mention that, despite the major and essential involvement of the physicians and pharmacists in the processes related to accessing drugs, no communication plan was developed by Health Canada to inform the communities and these professionals regarding the changes that this insurance plan transfer involves (RAMQ to NIHB).

SOLUTION

- Your client can contact Health Canada's Claims Processing Centre at 1-877-483-1575 in order to obtain information;
- You can provide your client with support for their appeal steps, if necessary;
 - ✓ *See the section on the appeal processes related to drugs.*
- Give your client the NIHB information booklet;
- If your client already paid the bill, they will have the opportunity to be reimbursed for all medications purchased **starting from the date indicated in the letter from AANDC confirming their status** by forwarding **by mail**:
 - The pharmacy's **original** invoice;
 - A duly completed NIHB reimbursement form.
 - ✓ *See the appended form.*

All of the documentation must be transmitted to the following address (a delay of 30 days must be anticipated for payment):

First Nations and Inuit Health Branch

Quebec region
Non-Insured Health Benefits
Guy-Favreau Complex, East Tower, Suite 404
200 René-Lévesque Boulevard West
Montreal, Quebec H2Z 1X4

Reason

Coordination of the benefits (private insurance).

Since the implementation of the NIHB program, Health Canada has considered itself to be the payer of last resort.

When a client possesses private insurance, Health Canada therefore asks them to bill their private insurance first. If a residual amount remains unpaid by the private insurance, the client can seek reimbursement for the difference from Health Canada.

In the past, this practice was not always applied since the pharmacists were not systematically asking the clients if they had private insurance. If the client was known to be First Nations person, the pharmacist would deal directly with Health Canada. In August 2012, a letter was forwarded by Health Canada to all pharmacists informing them that, henceforth, they would have to ask all of their First Nations clients if they have private insurance.

Since August 2012, as soon as a claim is filed with a private insurance plan for any service covered by Health Canada (vision, dental care, medical supplies, etc.), the name of the private insurer is automatically registered in the patient's electronic file. This means that all clients with private insurance will be identified by Health Canada.

The following are the possible scenarios:

Person without private insurance	Person with private insurance covering the same services as NIHB	Person with private insurance excluding the services covered by NIHB
<p>No change. The NIHB program will pay for the services as the last payer.</p>	<ul style="list-style-type: none"> • The person must first of all seek reimbursement from their private insurance plan before filing a claim with the NIHB program. • If a service or a portion of the amount to be paid is not reimbursed by the private insurance plan, a request can be made to the NIHB program. <p> <i>See important note</i></p>	<ul style="list-style-type: none"> • If the insurer explicitly excludes the NIHB services, the request can be sent to NIHB directly. • If the insurer's position is not clear, the person must first seek reimbursement from their private insurer and obtain proof that it does not cover the requested services before filing a claim with the NIHB program.

IMPORTANT NOTE

CERTAIN PROBLEMATIC SITUATIONS COULD ARISE:

- Some private insurers only provide reimbursement in a manual fashion. In this situation, the client must pay for their drugs before seeking reimbursement from their insurer. This causes delays of a few weeks before the client can be reimbursed.
- Certain insurers only reimburse 80% of the cost of the medication. The difference can be submitted to Health Canada, but it is subject to the same authorisation procedures. This means that, despite the fact that the private insurer accepted to cover a portion of the cost of the drug, it is not guaranteed that Health Canada will pay the difference, which leaves the client in a position where they must cover the residual amount.
- Private insurers may be more inclined to provide coverage for original drugs while the NIHB program only provides coverage for equivalent generic drugs, which are less expensive. Consequently, when coordinating the reimbursement requests, it is possible that Health Canada may refuse to reimburse the difference between the cost of the drug and what the private insurer covered if the client did not specifically request the generic drug.

GENERIC DRUGS VS. ORIGINAL DRUGS

WHY IS MY PHARMACIST GIVING ME A GENERIC DRUG EVEN IF MY PRESCRIPTION INDICATES AN ORIGINAL DRUG?

Health Canada only covers equivalent generic drugs in order to ensure cost effectiveness while limiting the costs of the program.

Original drug: A drug produced by a pharmaceutical company that is protected by a patent.

Generic drug: A copy of an original drug for which the patent has expired. It meets the same quality and safety criteria as the original drug. Generic drugs are sold for 30 to 50% less than the cost of the original drug.

WHY ARE GENERIC DRUGS LESS EXPENSIVE?

In Canada, original drugs are protected by a 20-year patent. When the patent expires, all other pharmaceutical companies have the right to produce the same drug and market it, without however using the same brand name. Once approved by Health Canada, a generic drug is considered to contain the same active ingredients as the original drug and satisfies the same quality and effectiveness standards.

The cost of a generic drug is generally lower than the cost of an original drug. This is explained among other things by the fact that the companies producing original drugs, contrarily to those producing generic drugs, invest a lot of money in research and development as well as the promotion of the new drug (*Ordre des pharmaciens du Québec*).

The NIHB Program reimburses the costs of an original drug for the **two following reasons**:

1. When a patient experiences an undesirable effect with the generic drug.

In this type of situation, the pharmacist must:

- Obtain a prescription upon which the words “no substitution” or “do not substitute” have been clearly written by the physician by hand; and,
- Contact the Drug Exception Centre so that they can send the physician the duly signed and completed “Report of Suspected Adverse Reaction Due to Health Products Marketed in Canada” form.

 See the appended form.

Note: When renewing a prescription, it is not necessary to submit another form regarding suspected adverse reaction due to a pharmaceutical product. However, the new prescription must indicate “no substitution” or “do not substitute”.

2. When the generic drug is unavailable (e.g. out of stock).

In either of these situations, the pharmacist must contact the Drug Exception Centre to obtain an authorisation number allowing coverage for the original drug by Health Canada.

Appeal Procedures

Drug Benefits

- 91 Practical advice in order to properly prepare an appeal request
- 92 Things that could be included in the letter of appeal
- 93 Other relevant documents to be included with the letter of appeal
- 94 First level of appeal
- 95 Second level of appeal
- 96 Third level of appeal

APPEAL PROCEDURES FOR DRUG BENEFITS

An appeal procedure is not automatically required in the event that payment for a drug is denied.

In order to ensure that it is indeed the only remaining solution in order to obtain the prescribed drug, it is recommended to confirm the relevance of your appeal request with the Claims Processing Centre located in Montreal by calling 1-877-483-1575.

There are three possible levels of appeal in order to attempt to overturn Health Canada's decision and allow access to the drug free-of-charge.

All of the appeal requests must be sent directly to Ottawa. However, for the first and second levels, the Drug Exception Centre will take care of reviewing your client's entire file and analysing their file's pharmacological history. For the third level of appeal, the NIHB Director General will perform the review.

The process is practically the same for all three levels of appeal. In summary, the appeal processes consist of sending to Health Canada:

- 1. A letter signed by your client** expressing their disagreement with Health Canada's decision and requesting a review of their file. It can also simply be a matter of a letter providing consent to review the file signed by the client.
 *See the appended example of a letter of appeal.*
- 2. A written document from the physician** justifying, in a more detailed fashion, the prescription for this drug. This justification could be provided in the form of a letter or simply written on a prescription slip.

These two documents are essential for the initiation of the file's review. The client's letter and the medical justification from the physician must be transmitted to the Drug Exception Centre by mail (to the addresses corresponding to the levels of appeal) or by fax.

Drug Exception Centre Fax number: 1-877-789-4379

The processing of an appeal request is relatively quick, but it can take up to 30 days starting from the date when all of the supporting documents are received by Health Canada.

The delay related to the processing of an appeal request is considerably longer when the physician is difficult to contact (visiting physician, emergentologist, etc.). It is possible that the client may need your support in order to reach their physician. The Health Care Liaison Agent can also support you in this process.

You can support your client in their process, but **it is necessary for it to be initiated by the patient or their legal guardian, meaning that they must sign the letter of appeal.**

PRACTICAL ADVICE IN ORDER TO PROPERLY PREPARE AN APPEAL REQUEST

Your client's letter of appeal can be very simple and brief. It is however recommended to include as much information as possible on your client's medical condition as well as any possible problems that could arise if they do not have access to the prescribed drug. Some contextual details could also favour the understanding of the case and justify the treatment.

-  See justification allowing for treatment coverage among the appended examples of letters of appeal.

In order to optimise the chances of a positive response while decreasing the delays associated with Health Canada's processing of the file, it is important for the letter of appeal to be well-structured.

It is **necessary** to properly understand the reasons why the drug is not covered. You can use these reasons to formulate your letter of appeal.

- **Since the eligibility criteria for the denied drugs are not public information**, the client can call Health Canada's Claims Processing Centre in order to verify with an agent the reasons behind the denial that are recorded in the file. Be sure to take notes on the reasons for the denial.

Claims Processing Centre: 1-877-483-1575.

- You can ask the pharmacist why the drug was denied.
- You can transmit the reasons for the denial to the physician who can then provide medical justification while taking these reasons into consideration. It is preferable to have a good collaborative relationship with the treating physician when proceeding with an appeal process, since additional information could later be required from them.
- Verify the NIHB program exclusions in the NIHB information booklet (page 23). If the requested drug is excluded from the program, an appeal is not possible. An exclusion is automatically rejected.

-  You can refer to pages 31 and 33 of the NIHB information booklet.

THINGS THAT COULD BE INCLUDED IN THE LETTER OF APPEAL:

- **The client must clearly express their disagreement with Health Canada's decision;**
- **Describing and justifying the need for the drug in question.**
 - The client must clearly describe why they need this treatment. They can also describe their diagnosis and prognosis;
- **Listing and emphasising the health problems associated with the denial of the treatment (medication).** For example: problems performing daily tasks, inability to work, constant pain, etc.;
- **Listing the alternative solutions that were tested before the prescription of this drug** (if applicable). Your client can mention the side effects caused by previous treatments or explain why these treatments were not effective and retained.

 See the appended example of a first level of appeal letter.

It is important to include as much information as possible in the letter of appeal.

OTHER RELEVANT DOCUMENTS TO BE INCLUDED WITH THE LETTER OF APPEAL

It is mandatory to obtain medical justification from the treating physician. This justification is required by Health Canada.

Examples of relevant medical justifications:

- A supporting letter from the prescribing physician that can be in the form of a letter or simply written on a prescription slip;
- Results of relevant examinations;
- Any other relevant documents or additional information.

See the appended example of demanding support to a physician.

If you are experiencing problems related to collaboration with the professional/provider, you can always contact the Health Care Liaison Agent of the FNQLHSSC in order to obtain support for the steps to be taken.

Health Care Liaison Agent: 418-842-1540.

FIRST LEVEL OF APPEAL DRUG BENEFITS

The letter of appeal signed by the client and the other supporting documents must be mailed to Health Canada's Drug Exception Centre in an envelope labelled "**Appeals – Confidential**" to the following address:

Director, Drug Exception Centre
First Nations and Inuit Health Branch
Non-Insured Health Benefits
200, Eglantine Driveway, Jeanne Mance building
Postal Locator 1914A
Ottawa (Ontario) K1A 0K9

We recommend sending the letter of appeal and the medical justification both by mail (mandatory) and by fax. Faxing it will accelerate the appeal processing.

Drug Exception Centre fax number: 1-877-789-4379.

If the drug that is being appealed has already been paid for by your client, they must include:

- The pharmacist's **original** invoice;
- The NIHB reimbursement form duly completed by your client (appended);
- The client's letter of appeal;
- The medical justification from the physician.

SECOND LEVEL OF APPEAL DRUG BENEFITS

If your client disagrees with the decision that was made by Health Canada following the first level of appeal, they can initiate the process for the second level of appeal.

 See the appended example of a letter for the second level of appeal.

It is important to properly understand the reasons behind the denial during the first level of appeal and to use these reasons to modify your letter for the second level and to provide the necessary justifications. Once again, you can make use of the pharmacist's collaboration in order to justify the treatment.

The client can simply modify the first letter of appeal by:

- Changing the date;
- Changing the title of the letter from “first appeal” to “second appeal”;
- Adding the required justifications.

The client must send the letter for the second level of appeal labelled “**Appeals – Confidential**” as well as all of the supporting documents by mail to the following address:

Director, Benefit Management
First Nations and Inuit Health Branch
Non-Insured Health Benefits
200, Eglantine Driveway, Jeanne Mance building
Postal Locator 1914A
Ottawa (Ontario) K1A 0K9

THIRD LEVEL OF APPEAL

DRUG BENEFITS

If the client disagrees with the decision made by Health Canada regarding their request in the context of the second level of appeal, they can send a last letter to the third and **final level of appeal**.

 See the appended example of a letter for the third level of appeal.

The client can simply modify the second letter of appeal by:

- Changing the date;
- Changing the title of the letter from “second appeal” to “third appeal”;
- Adding the required justifications.

The client must send the letter for the third level of appeal labelled “**Appeals – Confidential**” as well as all of the supporting documents by mail to the following address:

Director General, NIHB
First Nations and Inuit Health Branch
Non-Insured Health Benefits
200, Eglantine Driveway, Jeanne Mance Building
Postal Locator 1914A
Ottawa (Ontario) K1A 0K9

The FNQLHSSC can provide you with support and assistance for all of the steps you will take with your client. Our expertise in the area of health care and services allows us to provide you with guidance while helping you to develop strategies related to demonstrating your needs and resolving your clientele's access issues.

Examples:

- Support in the development of the letters of appeal;
- Contacts with the health professionals concerned by the problem and facilitation of the steps to be taken among them;
- Development of strategies in a concerted fashion with you and your client in order to access health care and services;
- Transmission of contact information for various contacts and other relevant information.

You can contact the Health Care Liaison Agent of the FNQLHSSC at any time in order to obtain support at 418-842-1540.

Re.: **First level of appeal for BIPHENTIN**

Dear Sir/Madam,

I would like to appeal Health Canada's decision not to cover BIPHENTIN for my son XXXXXX XXXXXX, band no. xxxxxxxxxx.

The following is some additional information that you may find helpful in order to properly understand my son's precarious medical condition.

Xxxx xxxxxx is a young boy who suffers from diagnosed ADHD and an intellectual disability which prevent him from functioning properly within a social and educational context. A CONCERTA treatment has already been unsuccessfully experimented with. BIPHENTIN was therefore prescribed and the results of this treatment were remarkable.

For the last three (3) weeks now, xxxxx xxxxxx has no longer had access to his BIPHENTIN treatment, since the initial request for this treatment's coverage was denied by Health Canada. I am a social assistance beneficiary and I am unable to pay for this treatment.

I also suffer from an intellectual disability which prevents me from properly defending the rights of my son to access this important treatment while making it difficult for me to fully comprehend the appeal processes and communicate the exception criteria for this drug to the physician. It is my community's nurse who is helping me to fight for my son's right to health.

I have been receiving telephone calls from the school teachers who have observed a drastic change in my son's behaviour. It is increasingly difficult for him to be functional at school not to mention all the problems at home. Consequently, I am forced to keep my son at home due to his behavioural disorders. Therefore, I am sure you can understand this treatment's importance for my child's future.

I would like you to review this appeal request while taking into consideration the additional details provided in this letter.

While hoping for a favourable response on your behalf, I would like to thank you in advance for your understanding and please accept my best regards.

Re.: **First level of appeal for Lyrica coverage**

Dear Sir/Madam,

The purpose of this letter is to file a first appeal regarding the decision that was made not to provide Lyrica drug coverage. Indeed, reimbursement for this drug was denied and I disagree with the decision that was made.

This drug was prescribed for me because of the fact that I suffer from small fiber neuropathy. More specifically, I am experiencing chronic pain in both legs which has prevented me from functioning normally for many years now. I have in fact been experiencing this pain for approximately ten years. Since these symptoms began, I have tried many different treatments such as Venlasaxine, Gabapentin, Rivotril, etc. The pain was such that I had to use narcotics that were prescribed to me for pain relief purposes. Nothing about these treatments was genuinely conclusive.

Recently, my general practitioner, Dr. XXX XXX, gave me a neurology referral. I therefore consulted with Dr. XXX XXX, Chief of the neurology department at the Hôtel-Dieu de XXX, last July, who performed various tests on me including an electromyogram. In light of the results obtained and my pharmacological history, this physician reached the conclusion that the most appropriate treatment for my situation was Lyrica, and if this treatment wouldn't work, Cymbalta would have to be considered.

Please note that the constant pain I am currently experiencing is greatly hindering my normal functioning and even preventing me from sleeping. I work as a tourist guide and I organise tours. My work therefore requires me to be able to walk, but currently the pain I am suffering is intolerable. I cannot afford to allow my state of health to affect my ability to perform my work and that is exactly what is likely to happen if I am denied access to this treatment, which, according to my physician's expertise, will allow for greatly alleviating my symptoms.

Furthermore, I cannot afford to cover the costs related to this medication because of how expensive the treatment is. That is why I am seeking your assistance in helping me to obtain the treatment I need.

I would like to thank you in advance for your understanding and please accept my best regards.

XXXXXX QUEBEC XXX XXX

Re.: **Support request for an appeal process following Health Canada's denied coverage for LYRICA**

Dr. XXXXXX,

My name is xxx xxx and I am a nurse working for the xxxxx Health Centre. I would like to facilitate the steps and communications for the file belong to Mr. xxxxx xxxxxx (birth date: xx/xx/xxx) regarding coverage for his LYRICA treatment by Health Canada. Please note that Mr. XXXXX has provided me with the authorisation to contact you and make this request.

You prescribed a LYRICA treatment for Mr. XXXX. For First Nations people, this drug is covered on an exceptional basis under Health Canada's Non-Insured Health Benefits (NIHB) program. Consequently, the Drug Exception Centre sent you a form in order to justify coverage for this exception drug.

However, the request for LYRICA coverage (payment) was rejected by Health Canada. The reason for this denial as identified in the file is that there are other alternative drugs for your patient's treatment. Mr. XXXXX must therefore spend \$200 of his own money each month to receive his LYRICA treatment.

Since the treatment has been denied, we will soon be initiating procedures in order to appeal Health Canada's decision. This process enables the patient to have their file reviewed a second time, but it requires taking steps that are labour-intensive but also essential to obtain coverage.

In order to carry out this appeal process with Health Canada, I am seeking your precious and vital cooperation since you are the only person who can enable Mr. XXXXX to access this treatment free-of-charge.

I require a letter from you justifying the fact that LYRICA is the most appropriate therapy for your patient. This is in fact a Health Canada requirement before they accept to re-examine the file.

While taking the necessary steps with the Drug Exception Centre in Ottawa, the Benefit Review Manager explained to me that this treatment is seldom covered. In order for LYRICA treatment to be accepted by Health Canada, the patient must have previously tried three other similar treatments that are already included in the list of drugs that are covered by Health Canada, which are:

- ELAVIL
- VENLAFAXINE
- GABAPENTIN

In order to maximise the impact of your letter, it is essential to focus on the reasons supporting your initial prescription while briefly explaining why the other treatments do not apply or were not retained for Mr. XXXXX's treatment.

It would make my job a lot easier if you could send this letter directly to me so that I can assemble all of

the supporting documents and forward the appeal file in a single package. Considering the inherent delays associated with this type of process, we would appreciate it if you could send us all this documentation as quickly as possible so that we can submit the appeal file before the summer vacation.

Please do not hesitate to contact me if you are missing any information at all and I am available to answer any questions you may have.

I am highly appreciative of your cooperation and please accept, Dr. XXXXX, my best regards.

Re.: **First level of appeal for CYMBALTA coverage**

Dear Sir/Madam,

The purpose of this letter is to file a first level of appeal related to Health Canada's decision not to provide coverage for my CYMBALTA medication. I suffer from fibromyalgia. My treating physician prescribed DILIODID in order to relieve my intense pain, but this drug causes many side effects for me as well as severe intestinal reactions.

Dr. XXX XXX then prescribed CYMBALTA which is recommended for the treatment of fibromyalgia. You will be able to observe upon reading the enclosed medical prescription that CYMBALTA is the best treatment for me, since I've already tried other drug combinations including antidepressants and narcotics. Considering my complex medical condition, this is the most highly recommended treatment in order to achieve the results expected by my physician.

While hoping that you will reconsider my situation, I would like to thank you in advance for your cooperation and please accept my best regards.

Re.: **First level of appeal for denied CIPRALEX drug coverage**

Dear Sir/Madam,

The purpose of this letter is to file a first appeal regarding the decision that was made not to provide coverage for the Cipralext drug that was prescribed to me by Dr. XXX XXX, a psychiatrist specialised in eating disorders at the XXX XXXX Hospital. Indeed, my request for authorisation was denied and I disagree with the decision that was made.

I have been diagnosed as suffering from major postpartum depression with occasional episodes of severe hyperphagia. In order to resolve this problem, Dr. XXXX prescribed certain treatments to me such as Zoloft which did not have the desired effects despite a gradual increase in dosage. After having reached the maximum recommended dose for my type of disorder, we attempted another treatment, Celexa. Since we were searching for the most appropriate treatment for my situation, my physician gave me Celexa samples in order to evaluate its effects before giving me an actual prescription.

After a few weeks of treatment, we were able to observe that this drug was causing constant drowsiness for me which was preventing me from taking care of my family and professional obligations. Please keep in mind that I am a single parent and the mother of an 18 month old little girl. This particular situation requires me to be constantly alert at home in order to be able to properly care for my child and ensure her safety. Furthermore, I work on a full-time basis and, considering my family situation, I cannot afford to lose my job due to drowsiness caused by my medical treatment. The resulting loss of income would have a major impact on my personal and family situation.

That is why the only and final possible solution for my treatment is Cipralext. This drug is highly recommended for eating disorders and, since I was able to test it with the samples I was given, I can testify to its benefits on my general state. Thanks to this treatment, I am able to carry out my family responsibilities and fulfill my professional obligations while controlling the symptoms generated by my disorder.

However, this drug is expensive and I am unable to cover the costs due to my family situation despite my income. That is why I am asking you to analyse my particular situation while keeping in mind the importance of this treatment as well as its effectiveness and benefits for my general state.

I would like to thank you in advance for your cooperation and please accept my best regards.

3.0	NIHB PHARMACY PUBLICATIONS.....	11
4.0	MEDICAL SUPPLIES AND EQUIPMENT BENEFITS.....	12
5.0	NIHB MEDICAL SUPPLIES AND EQUIPMENT PUBLICATIONS	15

The purpose of this document is to explain the overarching policies that guide the administration of the pharmacy and medical supplies and equipment benefits under the Non-Insured Health Benefits Program of Health Canada’s First Nations and Inuit Health Branch (FNIHB).

This policy framework is intended to provide stakeholders, providers and clients with a broad overview of the parameters of the NIHB Program policies as they relate specifically to the pharmacy and medical supplies and equipment (MS&E) benefit area.

1.0 THE NON-INSURED HEALTH BENEFITS PROGRAM

1.1 Overview

The *Canada Health Act* requires that provinces and territories provide coverage for “insured services” (medically necessary hospital and physician services) to all eligible residents including First Nations and Inuit. Individuals may have access to other health-related goods and services through other publicly-funded programs or through private insurance plans.

The Non-Insured Health Benefits Program is a national program that provides coverage to registered First Nations and recognized Inuit for a limited range of medically necessary health-related goods and services to which these individuals are not entitled through other plans and programs.

1.2 Program Objectives and Principles

The objectives of the NIHB Program are to provide benefits to registered First Nations and recognized Inuit in a manner that:

- β is suitable to their unique health needs;
- β helps eligible First Nations and Inuit to reach an overall health status that is comparable to other Canadians;
- β is cost-effective; and
- β will maintain and improve health, prevent disease and assist in detecting and managing illnesses, injuries, or disabilities.

The NIHB Program operates according to a number of guiding principles:

- β All registered First Nations and recognized Inuit who are normally residents of Canada, and not otherwise covered under a separate agreement with federal, provincial or territorial governments, are eligible for Non-Insured Health Benefits, regardless of location in Canada or income level.
- β Benefits are based on the judgment of recognized medical professionals, consistent with the best practices of health services delivery and evidence-based standards of care.
- β There is national consistency of mandatory benefits, equitable access and portability of benefits and services.
- β The Program is to be managed in a sustainable and cost-effective manner.

**PHARMACY AND MEDICAL SUPPLIES AND EQUIPMENT BENEFIT
NON-INSURED HEALTH BENEFITS PROGRAM**

- β Management processes will involve transparency and joint review structures whenever agreed to with First Nations and Inuit organizations.
- β In cases where a benefit is covered under another health care plan, the NIHB Program will act to coordinate payment in order to help ensure that the other plan meets its obligations and that clients are not denied service.

1.3 Client Eligibility

To be eligible for NIHB Program benefits from Health Canada, a person must be a Canadian resident and have the following status:

- β is a registered Indian according to the *Indian Act*; or
- β an Inuk recognized by one of the following Inuit Land Claim organizations - Nunavut Tunngavik Incorporated, Inuvialuit Regional Corporation or Makivik Corporation. For an Inuk residing outside of their land claim settlement area, a letter of recognition from one of the Inuit land claim organizations and a birth certificate are required; or
- β an infant, less than age one, whose parent is an eligible client; and
- β is currently registered or eligible for registration, under a provincial or territorial health insurance plan; and
- β is not otherwise covered under a separate agreement (e.g. a self-government agreement such as the Nisga'a and Nunatsiavut agreements) with federal, provincial or territorial governments.

1.4 Coordination of Benefits

Clients are required to access any public or private health or provincial/territorial programs for which they are eligible prior to accessing Non-Insured Health Benefits.

When an NIHB-eligible client is also covered by another public or private health care plan, claims must be submitted to the client's other health care/benefits plan first. The NIHB Program will then coordinate payment with the other payer on eligible benefits.

1.5 NIHB Program Client Reimbursement

Service providers are encouraged to bill the NIHB Program directly so that clients do not face charges at the point of service when receiving health care goods or services.

When a client does pay directly for goods or services, he or she may seek reimbursement from the NIHB Program within one year from the date of service or date of purchase. In order to be reimbursed, the service or the item must be an eligible benefit under the NIHB Program.

All requests for reimbursement of eligible benefits must include a completed NIHB Client Reimbursement Form, original receipts and a copy of the prescription.

Additional information on the NIHB Program client reimbursement process can be obtained from the nearest Health Canada regional office or found on the Health Canada website under the Benefits Information section (www.healthcanada.gc.ca/nihb).

1.6 NIHB Program Appeal Process

NIHB-eligible clients have the right to appeal the denial of an NIHB benefit with the exception of items that are insured services or identified as exclusions. Appeals must be initiated and submitted in writing by the client, their legal guardian or representative (e.g. a physician, MS&E provider, authorized by the client or legal guardian). At each stage of the appeal process, supporting information/documentation from a health care provider(s) must also be provided to justify the grounds on which the appeal is based. If an appeal is denied, the reason for the denial will be provided to the client in a timely manner.

Additional information on the NIHB Program appeals process can be obtained from a Health Canada regional office or found on the Health Canada website under Benefits Information, Procedures For Appeals section (www.healthcanada.gc.ca/nihb).

1.7 NIHB Provider Audit Program

Audit activities are conducted as part of the NIHB Program's need to comply with accountability requirements for the use of public funds and to ensure provider compliance with the terms and conditions of the Program, the NIHB Benefit Policy Frameworks and the NIHB Provider Guide provided to pharmacy and MS&E providers, along with other relevant documents.

The objectives of the NIHB Provider Audit Program are to:

- β prevent and detect inappropriate billing practices;
- β detect billing irregularities;
- β validate active licensure of registered providers;
- β ensure that services paid for were received by eligible NIHB Program clients; and
- β ensure that providers have retained appropriate documentation to support submitted claims.

Audit activities are administrative in nature and based on accepted industry practices. Claims not meeting the billing requirements of the NIHB Program are subject to audit recovery.

1.8 Privacy

Health Canada's Non-Insured Health Benefits Program is committed to protecting clients' privacy and safeguarding the personal information in its possession. When a benefit request is received, the NIHB Program collects, uses, discloses and retains an individual's personal information according to the applicable federal privacy legislation. The information collected is limited to only that information required for the NIHB Program to administer and verify benefits.

As a program of the federal government, the NIHB Program must comply with the *Privacy Act*, the *Canadian Charter of Rights and Freedoms*, the *Access to Information Act*, the Treasury Board of Canada Privacy and Data Protection Policies, the Government Security Policy, and Health Canada's Security Policy.

2.0 PHARMACY BENEFITS

2.1 Objective

The objective of the pharmacy benefit is to provide eligible clients with access to pharmacy benefits and services in a fair, equitable and cost-effective manner that will:

- β contribute to improving the overall health status of First Nation and Inuit clients, recognizing their individual health needs and the context of health service delivery; and
- β provide coverage for a range of drug benefits and services based on professional judgment, consistent with the current best practices of health services delivery and evidence-based standards of care.

2.2 Client Safety

To help ensure that NIHB clients use prescription and other drug benefits in an appropriate and safe way, the NIHB Program has developed various mechanisms to guide the Program in identifying potential cases of drug misuse as well as to promote optimal drug use. These practices include:

- β Rejection messages that are electronically generated and sent to pharmacists regarding potential severe drug-to-drug interactions and refilling repeat prescriptions too soon;
- β Rejection messages that warn pharmacists of inappropriate client drug therapy based on their prescription history;
- β Client and Program level trend analysis of prescription drug use that is conducted regularly; and
- β An external expert advisory committee that provides input into evaluations and recommendations for improvements to the Program.

More information is available in the NIHB *Report on Client Safety*, published on an annual basis and available on the Health Canada website (www.healthcanada.gc.ca/nihb-publications).

2.3 Pharmacy Benefits Coverage

NIHB pharmacy benefits consist of items on the NIHB Drug Benefit List (DBL) when prescribed by an NIHB-recognized prescriber. The NIHB Drug Benefit List includes specific eligible items in the following categories:

- β drug delivery devices, required to administer medications covered by the NIHB Program for certain conditions, when the drug delivery devices are integral to the drug product;
- β extemporaneous mixtures / compounded prescriptions;
- β injectable drugs, including injectable allergy serums;
- β over-the-counter medications;
- β prescription drugs;
- β recognized non-oral contraceptive devices;
- β special formularies for chronic renal failure and palliative care patients; and
- β therapeutic vitamins and minerals.

2.4 Pharmacy Benefit Prescribers

Pharmacy benefits must be prescribed by an NIHB-recognized prescriber, licensed and authorized to prescribe within their professional scope of practice in their province or territory. Scope of practice is determined by provincial/territorial regulatory bodies.

2.5 Pharmacy Benefit Providers

Pharmacy benefits must be provided by an NIHB-recognized provider in accordance with the policies and procedures set out in the current NIHB Provider Guide given to pharmacy providers.

2.6 Accessing Benefits

NIHB-eligible clients must obtain a prescription from an NIHB-recognized licensed prescriber.

Clients must bring the prescription to either:

- β a pharmacy, or
- β a nursing station or health centre, which may arrange to have the prescription sent to a local pharmacy.

In some cases, the pharmacist may be required to obtain prior approval from the NIHB Drug Exception Centre before filling the prescription.

Clients are encouraged to:

- β inform the pharmacist/NIHB-recognized licensed prescriber if they have coverage under any other plan;
- β inform the pharmacist/NIHB-recognized licensed prescriber that they are eligible to receive benefits under the NIHB Program;
- β self-identify by providing their nine or ten-digit identification number (treaty/status, 'N' or 'B' number), band name and family number or other health care number; and
- β talk to the pharmacist about medication prescribed and how to take it.

2.7 Types of Pharmacy Benefits

A complete list of pharmacy benefits can be found in the NIHB Provider Guide provided to pharmacy providers and on the Health Canada website in the NIHB Health Provider Information section (www.healthcanada.gc.ca/nihb).

Open Benefits

Open benefits are items listed on the NIHB Drug Benefit List that do not have established criteria or prior approval requirements.

Limited Use

Limited use drugs are those which have been found to be effective in specific circumstances, or which have quantity or frequency limitations. For drugs in this category, prior approval must be given and specific criteria must be met to be eligible for coverage.

Exceptions

Exceptions are items not listed as benefits on the NIHB Drug Benefit List and not exclusions under the NIHB Program. Requests may be considered on a case-by-case basis with written medical justification. The pharmacist should contact the NIHB Drug Exception Centre (DEC) to initiate the exception process at: Telephone: (Toll Free) 1-800-580-0950 or Fax: 1-800-281-5021 and obtain prior approval.

Exclusions

Exclusions are items not listed as benefits on the NIHB Drug Benefit List and are not available through the exception process (eg. household products, cosmetics, hair growth stimulants and megavitamins). These items, therefore, are not considered for coverage under the NIHB Program. Exclusion items cannot be appealed. A complete list of pharmacy benefits exclusions can be found on the Health Canada website in the NIHB Health Provider Information section (www.healthcanada.gc.ca/nihb).

2.8 The NIHB Drug Review Process

The NIHB Program, like other publicly-funded drug plans, makes listing decisions based on the recommendations of evidence-based review processes and other specific relevant factors, such as the Program's mandate and the specific circumstances of NIHB clients.

The NIHB Program participates in these evidence-based review processes in order to consider current medical and scientific knowledge, current clinical practice, health care delivery and specific client health needs. The Program makes decisions based on this expert advice with the goal of maintaining a comprehensive list of cost-effective drugs which will allow practitioners to prescribe an appropriate course of therapy for NIHB clients.

Canadian Expert Drug Advisory Committee (CEDAC):

The NIHB Program is a member of the Federal/Provincial/Territorial (F/P/T) Common Drug Review (CDR) process, which reviews new chemical entities, existing drug products with a new indication and new combination drug products on the Canadian market on behalf of all F/P/T public drug plans (with the exception of Quebec).

Drug submissions for new chemical entities, existing drug products with a new indication and new combination drug products must be sent to the Canadian Agency for Drugs and Technologies in Health (CADTH). Clinical and pharmacoeconomic reviews are coordinated by the CDR Directorate and forwarded to the Canadian Expert Drug Advisory Committee (CEDAC) for recommendations on formulary listings. These recommendations are forwarded to participating drug plans, including the NIHB Program, for consideration.

Federal Pharmacy and Therapeutics Committee (FP&T)

Modifications to existing drug products on the Drug Benefit List and Therapeutic drug class reviews are referred to the Federal Pharmacy and Therapeutics (FP&T) Committee, an advisory body of health professionals established by federal drug plans to provide evidence-based pharmacy and medical advice to participating federal departments. The FP&T Committee then makes recommendations on potential modifications to formulary listings to the NIHB Program and other participating federal drug plans.

Line extensions and Generics:

Line extension drug products (i.e. a new dosage for the same drug) and generic drug products, are reviewed internally by NIHB health professionals. Line extension and generic drug products are considered for inclusion on the NIHB formulary based on therapeutic need, cost and provincial/territorial interchangeability.

3.0 NIHB PHARMACY PUBLICATIONS

The NIHB Program maintains a broad list of pharmacy publications ranging from the Drug Benefit List, to an NIHB Provider Guide provided to pharmacy providers, to various information bulletins. For copies of NIHB pharmacy publications please consult the Health Canada website (www.healthcanada.gc.ca/nihb-publications).

4.0 MEDICAL SUPPLIES AND EQUIPMENT BENEFITS

Objective

The objective of medical supplies and equipment (MS&E) benefit is to provide NIHB-eligible clients with access to MS&E goods and services in a fair, equitable and cost-effective manner that will:

- β contribute to improving the overall health status of First Nation and Inuit clients recognizing their individual health needs and the context of health service delivery; and
- β provide coverage for a range of MS&E benefits and services based on professional judgment, consistent with the current best practices of health services delivery and evidence-based standards of care.

4.1 Medical Supplies and Equipment Benefit Coverage

The NIHB MS&E benefits are set out in the MS&E Benefit List and include specific eligible items in the following categories:

- β audiology equipment (e.g. hearing aids);
- β medical equipment (e.g. wheelchairs and walkers);
- β medical supplies (e.g. bandages and dressings);
- β orthotics and custom footwear;
- β oxygen and respiratory supplies and equipment;
- β pressure garments; and
- β prosthetics.

Further details can be found in the NIHB Provider Guide available for MS&E providers.

4.2 Medical Supplies and Equipment Prescribers

MS&E benefits must be prescribed by an NIHB-recognized prescriber. A list of recognized prescriber categories can be found on the Health Canada website in the NIHB Health Provider Information section (www.healthcanada.gc.ca/nihb).

4.3 Medical Supplies and Equipment Providers

MS&E benefits must be provided/dispensed by an NIHB-recognized provider. A list of recognized provider categories can be found on the Health Canada website in the NIHB Health Provider Information section (www.healthcanada.gc.ca/nihb).

4.4 Accessing Medical Supplies and Equipment Benefits

The NIHB Program provides a limited range of medically necessary health-related goods and services to eligible clients. The client obtains a prescription from an NIHB-recognized prescriber. The client submits the prescription to an NIHB-recognized provider.

In most cases the provider will have to obtain prior approval from a Health Canada regional office before providing the prescribed item.

Clients are encouraged to:

- β inform the MS&E provider if they have coverage under any other plan;
- β self-identify by providing their nine or ten-digit identification number (treaty/status, 'N' or 'B' number), band name and family number or other health care number;
- β contact a Health Canada regional office or a local First Nation Health Authority and Inuit organizations if the equipment (e.g. wheelchair, walker) is no longer required to find out if it can be recycled.

4.5 Types of Medical Supplies and Equipment Benefits

A complete list of MS&E benefits can be found in the NIHB Provider Guide provided to MS&E providers and on the Health Canada website in the NIHB Health Provider Information section (www.healthcanada.gc.ca/nihb).

Open Benefits

These are items listed on the MS&E Benefit List and do not require prior approval; they may, however, have quantity limitations. Requests for items beyond the established quantity limitations require prior approval with medical justification.

Prior Approval Items

These are items that must be approved by the NIHB regional office before they are dispensed by an NIHB provider. These NIHB benefits have specific criteria and require medical justification in addition to a prescription.

Exceptions

Exceptions are items not listed as benefits on the NIHB MS&E Benefit List and are not on the exclusion list. They may be considered on a case-by-case basis with written medical justification from an NIHB-recognized prescriber or health professional. The client or provider should contact the Health Canada regional office to initiate the exception process.

Exclusions

Exclusions are listed in the exclusion list in the NIHB Provider Guide for MS&E providers and are not subject to the exception process. Items such as, but not limited to, those used exclusively for sports, work or education, items for cosmetic purposes, and experimental equipment, treatment and therapies are not considered for coverage under the NIHB Program and are not subject to the NIHB Program appeal process.

5.0 NIHB MEDICAL SUPPLIES AND EQUIPMENT PUBLICATIONS

For additional information on NIHB MS&E benefits, please consult the Publications section of the Health Canada website (www.healthcanada.gc.ca/nihb-publications).

Privacy statement

Health Canada also requires your authorization in order to collect information from your medical provider for services provided to you and paid for by the Non-Insured Health Benefits Program. The NIHB Program is committed to protecting your privacy and safeguarding the personal information in its possession. When a request to provide coverage for benefits is received, the NIHB Program collects, uses, discloses and retains your personal information in accordance with the applicable federal privacy laws and policies. Further details of the NIHB Privacy Code can be found on the Health Canada website: http://www.hc-sc.gc.ca/fniah-spnia/pubs/nihb-ssna/_priv/2005_code/index-eng.php.

INFORMATION YOU NEED TO INCLUDE WITH YOUR COMPLETED CLIENT REIMBURSEMENT FORM

FOR ALL BENEFITS:

- Original receipt(s) for proof of payment. Credit card/Debit (Interac) slips are not acceptable forms for proof of payment.
- Sign and complete all applicable parts of this NIHB Client Reimbursement Request Form. Forms that are not signed will be returned to the client for signature. **Please see exceptions to the Dental /Orthodontic and Medical Transportation Benefits below.**
- If applicable, submit your detailed statement or explanation of benefits form from all other health plan(s)/program(s). Note: Original receipts are not required when submitting the detailed statement or explanation of benefits form as the primary insurer requires them. In such cases, a copy of the original receipt is acceptable.

Prescription Drugs

- No additional information other than what is listed above is required.

In addition to the items listed above, please submit the specific requirements for the benefits listed below:

Medical Supplies and Equipment, Vision & Eye Care

- A copy of your prescription.

Dental or Orthodontic Services (Please note: When submitting for reimbursement specifically for **Dental or Orthodontic Services** only, you may use the NIHB Client Reimbursement Request Form OR a Dent-29 Form).

- A completed claim form provided by the dental or orthodontic service provider. Only need one of the following:
 - Association des Chirurgiens Dentistes du Québec Dental Claim and Treatment Plan Form
 - Standard Dental Claim Form
 - Canadian Association of Orthodontics Information Form

Medical Transportation (Please note: When submitting for reimbursement specifically for medical transportation only, you may use the NIHB Client Reimbursement Request Form OR a regional specific medical transportation form provided by the Health Canada regional office).

- Proof of your medical appointment attendance.

MAILING INSTRUCTIONS

For all reimbursements (other than Orthodontics), please mail your completed form(s) and receipt(s) to the Health Canada Regional Office where service was provided.

** As per the Treasury Board of Canada Secretariat Government Security Policy.

Instructions to Complete the Canada Vigilance Adverse Reaction Reporting Form

- Use this form only to report adverse reactions to Canadian marketed health products, including prescription and non-prescription medications; natural health products; biologically derived products such as vaccines and fractionated blood products; cells, tissues and organs; radiopharmaceuticals; and disinfectants and sanitizers with disinfectant claims.
- All sections of the form should be filled in as completely as possible. Use a separate form for each patient. Up to two suspected health products for a particular adverse reaction may be reported on one form. Attach an additional form if there are more than two suspected health products for the adverse reaction being reported. Additional pages may be attached if more space is required.
- For the "Identifier" box, provide some type of identifier that will allow you, the reporter, to readily locate the case if you are contacted for more information; do not use the patient's name. See the Confidentiality disclaimer at the bottom of this page.
- Any follow-up information for an adverse reaction that has already been reported can be submitted using a new form, indicating that it consists of follow-up information, including, if known, the date of the original report and the Adverse Reaction Number provided in the acknowledgement letter.
- **Reports can be faxed** to 1-866-678-6789 (toll-free) **or mailed** to: Canada Vigilance Program, Marketed Health Products Directorate, Health Canada, Postal Locator 0701E, Ottawa, Ontario K1A 0K9. Postage paid labels are available at www.health.gc.ca/medeffect or by calling 1-866-234-2345 (toll-free). Do not send reports by e-mail.

Information on Adverse Reaction Reporting

What is an adverse reaction?

An adverse reaction is a harmful and unintended response to a health product. This includes any undesirable patient effect suspected to be associated with health product use. Unintended effect, health product abuse, overdose, interaction (including drug-drug and drug-food interactions) and unusual lack of therapeutic efficacy are all considered to be reportable adverse reactions.

A serious adverse reaction is one that requires in-patient hospitalization or prolongation of existing hospitalization, causes congenital malformation, results in persistent or significant disability or incapacity, is life-threatening or results in death. Adverse reactions that require significant medical intervention to prevent one of these listed outcomes are also considered to be serious.

Which adverse reactions should be reported?

All suspected adverse reactions should be reported, especially those that are:

- *unexpected*, regardless of their severity, i.e., not consistent with product information or labelling; or
- *serious*, whether expected or not; or
- reactions to *recently marketed health products* (on the market for less than five years), regardless of their nature or severity.

Alternative ways to report

You can also report side effects to health products to the Canada Vigilance Program:

- By calling 1-866-234-2345 (toll-free)
- Online: www.health.gc.ca/medeffect

The Canada Vigilance Adverse Reaction Reporting Form is also available online at www.health.gc.ca/medeffect or at the back of the *Compendium of Pharmaceuticals and Specialties* (CPS).

Other Information

- Submission of a report does not constitute an admission that medical personnel or the product caused or contributed to the adverse reaction.
- Adverse reaction reports are, for the most part, only suspected associations. A temporal or possible association is sufficient for a report to be made. Reporting of an adverse reaction does not imply a definitive causal link.
- Health professionals and consumers may also report adverse reactions to the market authorization holder (MAH). Indicate on your adverse reaction report sent to Health Canada if a case was also reported to the product's MAH.

For additional information, contact a Canada Vigilance Regional Office by telephone at 1-866-234-2345 (toll-free) or:

Confidentiality

Personal information collected, used or disclosed under the Canada Vigilance Program is confidential and protected. For the purposes of the Canada Vigilance Program, information related to the identity of a patient and/or reporter of the adverse reaction will be protected as personal information under the Privacy Act, and under the Access to Information Act, in the case of an access to information request. Provision of the information requested on this form is voluntary. Information from adverse reaction reports is maintained in a computerized database and used for the monitoring of marketed health products, which may contribute to the detection of potential product-related safety issues, as well as to the benefit-risk assessments of these products. For details about personal information collected under this program, visit the Government of Canada web site on Institution-Specific Personal Information Banks under Health Canada, Health Products and Food Branch, Branch Incident Reporting System, PIB # ppu 088 at: <http://infosource.gc.ca/inst/shc/fed07-eng.asp> (Health Products and Food Branch, Branch Incident Reporting System).

ORDRE DES **PHARMACIENS** DU QUÉBEC

Présent pour vous

IMPORTANT: In order to **send** this form by email, you must download the latest version of Acrobat Reader.
Click on the following link: get.adobe.com/reader/

1. Request for Inquiry

This form is addressed to the Inquiry Department of the Ordre des pharmaciens du Québec to inform them that a pharmacist has committed an infraction under the *Professional Code* (R.S.Q., c. C-26), the *Pharmacy Act* (R.S.Q., c. P-10) or the regulations thereto and to request that an inquiry be undertaken to this effect.

Please complete the form and click on the "Send" button or print the form and send it to the **Inquiry Department, Ordre des pharmaciens du Québec, 266 Notre-Dame West, Suite 301, Montreal, Quebec, H2Y 1T6**. Your request will be processed as soon as possible.

2. Identification of the Applicant

Mrs. Mr.

Last Name _____ First Name _____

Date of Birth, only if the applicant is the patient (YYYY/MM/DD) / /

Address _____

City _____ Province _____ Postal Code _____

Phone Home _____ Office _____ Ext. _____ Mobile _____

Relationship with Patient (if applicable) _____

Witness _____ Phone _____

3. Identification of the Patient (if different than the person requesting the inquiry)

Mrs. Mr.

Name at Birth _____ First Name _____

Date of Birth (YYYY/MM/DD) / / Phone _____

4. Identification of the Pharmacist

Name of the Pharmacist Involved _____

Name of the Establishment (see on the label and/or the receipt) _____

Address _____

City _____ Province _____ Postal Code _____

Phone _____

5. Reasons for the Request for Inquiry

Do you have in your possession any document or any other items (medication) relevant to the inquiry? Yes No

If yes, and you are unable to send them electronically, please forward them to us by mail along with this completed form.

Relate the facts and indicate the reasons why you are requesting this inquiry. Do not forget to specify the dates, times or periods relating to the events or incidents in the order in which they occurred.

If there is not enough space, please attach another document to the form.

6. Inquiry Follow-Up

According to the *Professional Code*, you will be informed in writing of the progression of the inquiry and its outcome. If you prefer not to be informed, partially or completely, please check the box corresponding to your choice.

- I do not wish to be informed of the progression of the inquiry. (I wish to be informed of the outcome only.)
- I do not wish to be informed of the progression and the outcome of the inquiry. (I do not wish to be informed at all.)

Signature required if the form is printed.

Dear Doctor:

To expedite the approval of palliative care medications, the NIHB program has provided you with a "Physician-Initiated Palliative Care Formulary Request Form". Please complete the attached form in full and be sure to include the Client ID. **Please note that failure to fully complete the form and provide the Client ID (status card number) will result in a re-fax, which may cause delays in the processing of your request.**

Once completed, please fax this form to the Drug Exception Centre at 1-877-789-4379

Should you have any questions or concerns regarding this case, please call the Supervisor of the Drug Exception Centre at (613) 946-9608 or (613) 954-8780.

Thank you for your cooperation.

Sincerely,

Manager,
NIHB Drug Exception Centre
